

z6 (6.8)

Oblicz granicę

$$\lim_{n \rightarrow \infty} \frac{2 + 5 + 8 + \dots + (3n + 5)}{3n^2}.$$

① Zapisujemy licznik jako sumę ciągu arytmetycznego,

$$a_1 = 2, \quad r = 3$$

$$a_k = 2 + (k-1) \cdot 3 = 3k-1$$

$$3k-1 = 3n+5$$

$$3k = 3n+6$$

$$k = n+2 \quad (\text{liczba wyrazów})$$

$$S_{n+2} = \frac{a_1 + a_{n+2}}{2} \cdot (n+2) = \frac{2 + 3n+5}{2} \cdot (n+2) = \frac{(3n+7)(n+2)}{2} = \frac{3n^2 + 13n + 14}{2}$$

② Obliczamy granicę.

$$\lim_{n \rightarrow \infty} \frac{S_n}{3n^2} = \lim_{n \rightarrow \infty} \frac{3n^2 + 13n + 14}{2 \cdot 3n^2} = \lim_{n \rightarrow \infty} \frac{\overset{1}{n^2} \left(\overset{0}{3} + \overset{0}{\frac{13}{n}} + \overset{0}{\frac{14}{n^2}} \right)}{\underset{1}{n^2} \cdot \underset{6}{6}} = \frac{1 \cdot 3}{1 \cdot 6} = \frac{1}{2}$$

$$\text{Odp.: } \lim_{n \rightarrow \infty} \frac{2+5+8+\dots+(3n+5)}{3n^2} = \frac{1}{2}.$$
